MTWAFIQ متوافق

MTWAFIQ supports enterprise transformation. We help an organization take a business problem to an approved Business Case, a delivery plan and a verified result, and we provide the programs, sector references and tools to do the work.

For Enterprise Clients

The problem

Good decisions need the right people in the right seats, and practice before the real meeting.

Board and executive simulations

The right people in the right seats

Four simulations set in the fictional Al-Qimma Bank train governance judgment, with simplified rules: Board Chairs, Meeting Table, Random Case and the weekly Al-Qimma Challenge for teams.

Who it is for: Boards, executive committees, governance and board secretariat teams, and future leaders.

Check the board: the points, who was caught in the wrong seat, and why.

What you get

- **Board Chairs**
  Seat the right people on a board, with simplified governance rules.
- **Meeting Table**
  Deal the cards to the people at the table; the page goes on the meeting-room screen.
- **Random Case**
  Draw a case for a group of three to five, by topic.
- **The Al-Qimma Challenge**
  Quick Cards and a Case of the Week, then one Real Move back in your own bank.

How access works

For Enterprise Clients
By a demo request, for your organization.

Watch it:
www.mtwafiq.com/board-chairs.html
#video-board-chairs

> **Good to know.** All people are fictional. The rules are simplified governance principles for learning, not legal advice.

Your next step

Request a Demo www.mtwafiq.com/contact.html

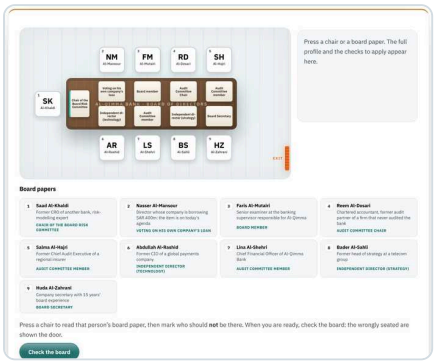

Send a demo request with your work email and name the simulation for your team.

What happens next. You give your name, organization, role and intended business use. The MTWAFIQ team reads every request and answers by email. Sending a request commits neither side. Access starts only after approval.

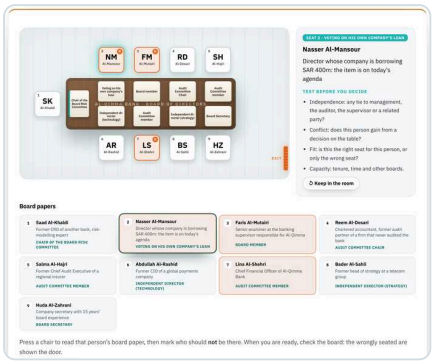

How it works

Step by step, as it looks on the screen. The cases and banks are fictional, and their figures are illustrative.

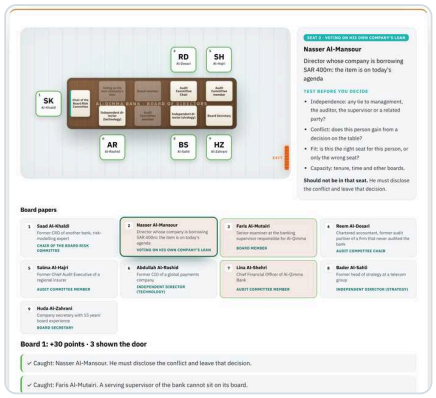

Board Chairs

1 The board of the fictional Al-Qimma Bank: nine seats, nine board papers.

2 Press a seat: the person, the checks before you decide; show the wrong ones the door.

3 Check the board: the points, who was caught in the wrong seat, and why.

The Al-Qimma Challenge

1 The Al-Qimma Challenge: teams climb the Road to Al-Qimma, week by week.

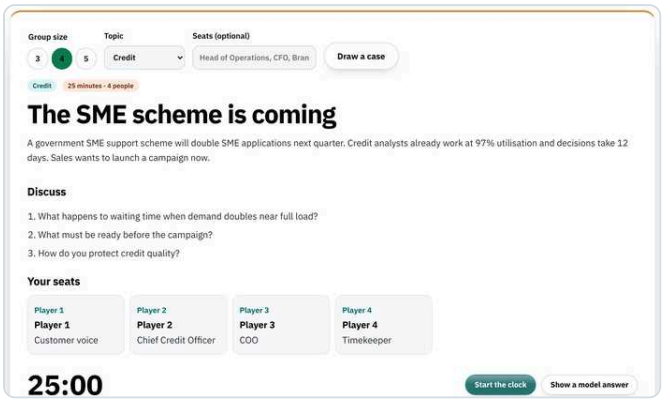

2 Each week: Quick Cards, the Case of the Week, then one Real Move; every point is a stone on the road.

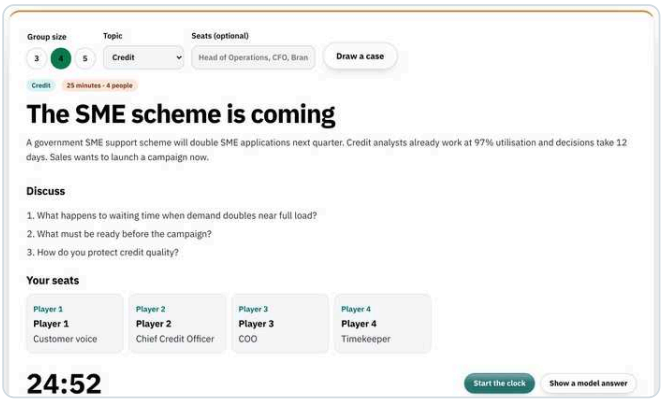

How it works

Step by step, as it looks on the screen. The cases and banks are fictional, and their figures are illustrative.

Random Case

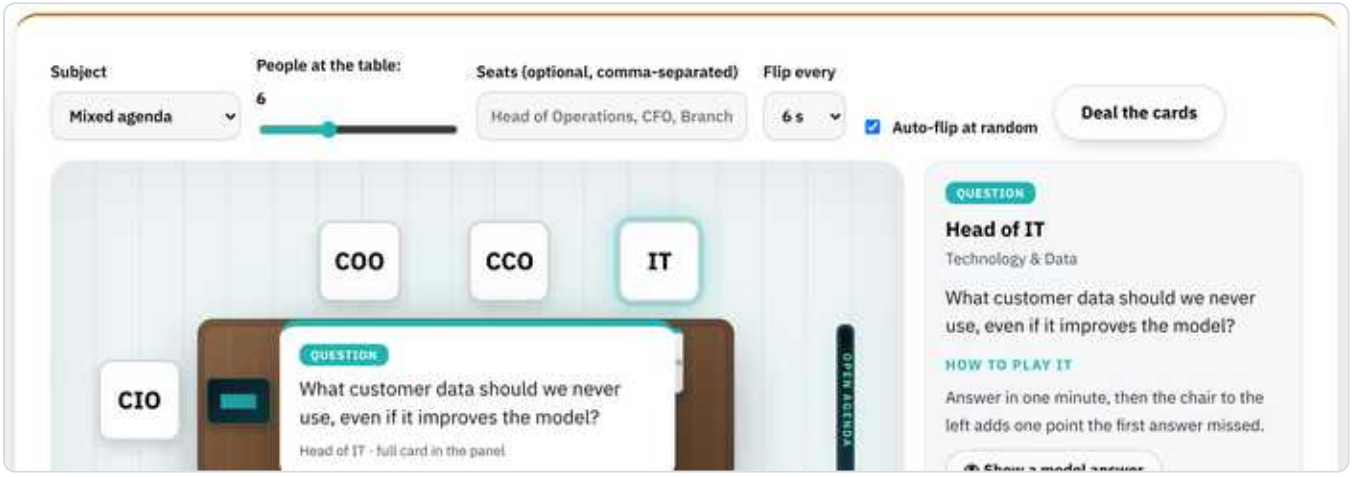

1 Random Case: choose the group size and topic, draw a case; each seat gets its role.

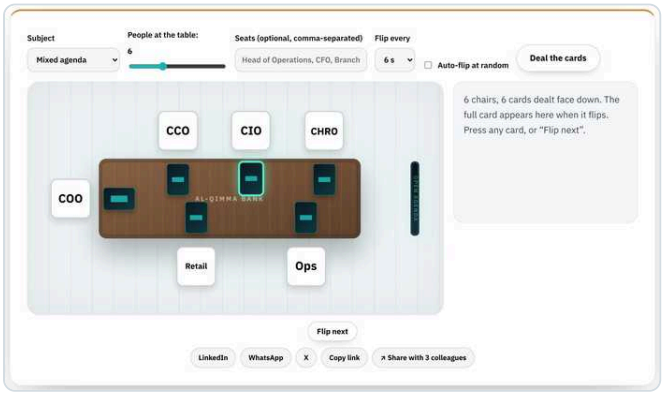

2 Start the clock, decide together, then compare with the model answer.

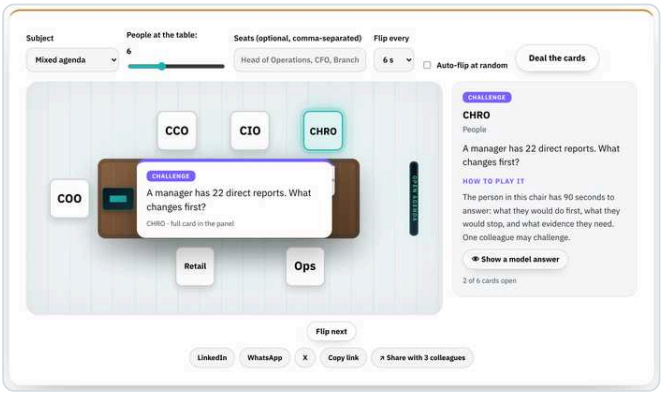

Meeting Table

1 Meeting Table: pick the subject and the number of people at the table.

2 Deal the cards: one card for each seat.

3 Flip the next card: each person answers from their seat.
